# Bittron

# Bittron is an open source peer-to-peer digital currency, favored by online community users worldwide.

The Bittron Network aims to process a block every 1 minute, rather than Bitcoin's 10 minutes and Litecoin's 2.5 minutes. This allows Bittron to confirm transactions much faster than Bitcoin and Litecoin. Bittron uses scrypt in its proof-of-work algorithm, a sequential memory-hard function requiring asymptotically more memory than an algorithm which is not memory-hard.

# Cryptocurrencies are not illegal in India but, they are not regulated. This means that you can buy and sell Bitcoin, even hold it as an Investment.

"There is a lot of confusion in India right now. The thing is that there are no regulations in the country yet. When people hear that, they get scared. The fact is that a lot of things on the internet are unregulated. These included services like Ola and uber, even e-commerce is un-regulated,"

# Let's start India's favourable Cryptocurrency. 1 Billion users will hold bittron in 2025.

Cryptocurrency in India is currently booming, the market has been thriving, and retail investors are adding to the fire with their enthusiasm. India has been estimated to have over 10M+ crypto investors, and this number is snowballing every day. Indians are believed to hold around US $ 1.5 billion (around ₹ 10,000 crore) in cryptocurrencies, according to unofficial estimates.

# A common reason to invest in cryptocurrency is the desire for a reliable, long-term store of value.

We believe that Bittron as a new, easy to access cryptocurrency, could appeal to regular people in larger numbers than we've seen with existing cryptocurrencies such as Bitcoin and Ethereum. As such, we think that Bittron will have great appeal for long-term holders. Those who wish to buy and hold Bittron for its future use cases. Anyone can be used bittron's any where of online and offline.
